

heavy-light

Poland

Balances:

laboratorial, electronic, etc.

**Balance estimates weight
of objects, products, people:
in shops, drug-stores, lifts,
airplanes, stores.**

These are weights. We feel the difference of burden of both weights. The first is heavier than the second one.

How many pumpkins does one kilogram weigh?

- Children weigh many objects.
- They read indications of a balance.
- They compare weight of objects.
- Which is heavier?

Children weigh horse-chestnuts.

- We weigh acorns
- We add acorns or remove them from the scales.

We check how much blocks weigh.
